

HP AutoStore

Integrate paper documents into digital workflows quickly and securely

HP AutoStore transforms workflows by enabling HP MFPs and HP Digital Senders to digitally capture, process, and route paper-based data to multiple destinations, including document management systems.

HP AutoStore streamlines business processes and enhances document workflows by digitally capturing, processing, and routing paper-based data to document-management applications, network folders, fax services, and printers at the touch of a button.¹ This market-leading software was *Transform Magazine's* Digital MFP-based Capture Product of the Year (2003) because it helps medium and large businesses with decentralized, paper-intensive workflows to enhance productivity, manage costs, and improve customer service.

Improved productivity

- **Send directly to your enterprise database and applications.** Support for leading document management systems, repositories, and databases includes Microsoft® SharePoint, Documentum, Hummingbird, iManage, and more.
- **Speed document distribution.** Electronic indexing and custom workflows increase accuracy and ensure fast distribution.² HP AutoStore lets you index data at the capture device according to criteria the administrator presets, to facilitate organized storage and quick retrieval.
- **Enhance your customers' experience and increase clientele.** Get instant access to useful information, including past purchases, customer profiles, and regional statistics.
- **Simplify routing and retrieval through advanced processing.** Quickly recognize, track, and index documents through barcode recognition; route key fields to databases through cutting-edge forms processing; and convert text with Optical Character Recognition (OCR) to make searching through archived documents much more efficient. The software uses OCR to convert documents from image files to searchable text in popular file formats, including PDF and XML.

Easy to use and manage

- **Simplify sending and increase accuracy with custom keys.** Custom keys makes it easy for users to code their document appropriately and send it to the correct destination. The administrator creates questions which appear on the device's touch-screen control panel in the form of custom keys; these prompt the sender to fill in the indexing information before the document is scanned.
- **Design workflows with a simple drag and drop interface.** AutoStore makes it easy for administrators to design custom document workflows. With an intuitive drag-and-drop interface and graphical representations, new document routes can be created without unnecessary complexity.

Flexible and expandable

- **Send to multiple destinations.** HP AutoStore sends to multiple document-management applications as well as network folders, printers, and fax services. The software comes standard with routing to Microsoft SharePoint Portal Server (version 2003), Microsoft Exchange, and Lotus Notes for easy integration into existing management systems.
- **Easily adapt to changing workflow requirements.** HP AutoStore supports an unparalleled breadth of processing and routing modules, which can be added as business processes expand or change. The modular design provides painless scalability and expandability.

Reduced total cost of ownership

- **Reduce costs while increasing productivity.** By automating manual paperwork processes, you can significantly reduce administrative and labor costs. HP AutoStore allows you to share electronic copies of paper documents quickly, without relying on interoffice mail, couriers, or regular mail. In addition, save storage space and decrease physical storage costs for files and filing cabinets by archiving documents electronically.
- **Consolidate sending devices.** Extend the capabilities of your workgroup and department-level HP LaserJet MFP family.
- **Minimize risk.** Ensure compliance with government and industry regulations and reduce litigation exposure through highly reliable document capture, indexing and tracking, and secure authentication of users through industry-leading security standards.

¹ Compatible capture devices include the HP Color LaserJet 9500mfp; HP LaserJet 4100/4101mfp, 4345mfp, 9000L/9000mfp, 9040/9050mfp, 9055/9065mfp, 8100/8150mfp; and HP Digital Sender 9100C and 9200C.

² Indexing data can only be added to documents captured on the HP LaserJet 9055/9065mfp via routing slip or barcode.

HP AutoStore

Support for HP AutoStore

HP offers support for HP AutoStore server and device licenses. Support may be ordered as an HP Care Pack or as part of an HP Imaging and Printing Support Services contract. HP support services for HP AutoStore include:

- Support and maintenance to keep the environment current and to troubleshoot problems (available during business hours).
- Major and minor upgrades for future releases and ongoing access to patches.
- A single, toll-free number which provides access to HP AutoStore customer support representatives for all software support issues.

You can order a 1-year AutoStore HP Care Pack through HP or your HP Authorized Reseller. For more information, please go to: www.hp.com/hps/carepack/. Contact your HP Sales Representative for information on how to purchase an HP Support Services contract.

Award-winning service and reliability

For over a decade, HP has consistently received the top grade in PC Magazine's Service and Reliability Survey and recently received one of the first A+ ratings ever given. HP's commitment to reliable products coupled with dependable support translates into increased uptime and an excellent return on your business investment.

Consulting and integration services

HP also offers Consultative Assessment Services to help you evaluate your needs and Design & Implementation Services to integrate HP AutoStore into your environment. For more information, please contact your HP Sales Representative.

Technical specifications

HP product number	T1943AA
Compatible capture devices	HP Color LaserJet 9500mfp; HP LaserJet 4100/4101mfp, 4345mfp, 9000L/9000mfp, 9040/9050mfp, 9055/9065mfp, 8100/8150mfp; and HP Digital Sender 9100C and 9200C
Workflow features	Send to multiple network folders, send to ftp, send to printer, send to back-end applications and repositories (MS SharePoint Portal Server, MS Exchange Folder, Lotus Notes), send to PC; Notification; Create/send metadata custom keys (via smtp only on LJ 9055/9065mfp); Basic OCR (ABBYY FineReader 6.0)
File formats	Over 200 formats OCR input: JPEG, TIFF, MTIFF, JTIFF OCR output: RTF, TXT, PDF, HTML, XLS, DBF, CSV
Send to email server required	Yes
Faxing	LAN Fax, Internet Fax, Windows 2000/XP Fax (supports leading third party fax solutions)
Optional components	Support for Poll Directory, POP3 Email, Batch Importer, ABM Exporter, Desktop Prod Pkg, VB/Jscript (Process/Route), Watermarks, Professional Image Mgt., Professional Barcode, PDF 417 Barcode, Basic Image Mgt., OMNI Page OCR, ABBY FormReader (6.0), Send to Database (route/process/bulk), Application Extender, Documentum (4.x/5.x), iManage (6.x), Hummingbird (5.x), Domino.doc, IXOS, OpenText, ABM Importer, etc.
Software updates	Download the latest software revisions and updates to a Web server through Web update services ³
Supported platforms	Windows 2000 Server, Windows 2003 Server
Minimum hardware requirements	Intel® Pentium®-based PC, Pentium III or greater, 650MHz or greater; minimum of 500 MB RAM; minimum of 500 MB free hard disk space
Licensing	
Type	Server licenses for software, optional components, and device licenses for MFPs using server software
Licensing device required	Yes
Multiple licenses supported	No
Localization	English, French, Italian, German, and Spanish

³ Requires an optional service contract.
